

RENOVATION & EXTENSION

COOP CHÂTEL-ST-DENIS

A residential and commercial building has replaced a formerly commercial-only building. Above the ground-floor Coop store, which has a newly expanded floor space of 2,200 m², offices have been added on the northern side of the building, and a three-story apartment building with 45 homes on the south-facing side. The building was erected using timber system construction. The architects achieved better utilisation of the access zones via an arcade concept.

Project owner	Coop Immobilien AG
Architect	Atelier d'architecture A3 SA
Engineering	Renggli AG
Year	2017
Standard	Minergie (without certificate)
Construction	Timber construction
Type of project	Additional stories
Renggli's responsibility	Timber construction
