

## NON-RESIDENTIAL &amp; COMMERCIAL CONSTRUCTION

# DOUBLE KINDERGARTEN LOHN

Children and teachers have two bright kindergarten rooms with a kitchen and with a separate break-out area in each. Teachers also have access to an auditorium with adjoining kitchen and delivery zone. We covered both the large spans, which enable children to play unimpeded, and the auditorium with large roof elements. These were fitted with acoustic ceilings in our Renggli factory. As such, only one element was needed between the transverse timber beams. This also allowed our assembly team to erect the kindergarten very quickly.

Project owner	Gemeinde Lohn
Architect	Sandri Architekten
Engineering	Wüst Rellstab Schmid AG Renggli AG
Year	2014
Standard	Minergie
Construction	Timber construction
Renggli's responsibility	Timber construction
